

Lesson Handout:
Cubecraft - Create your own! Level 2

- Step 1: Use a pencil and draw light, connecting lines across the top, front, and side of the template, and diagonals across the box.
- Step 2: Staying with pencil, add your character details, expression, and pose into the reference template. Ink with a pen, if you like!
- Step 3: Using the grid on the left vs. the skewed perspective grid on the right, copy over the lines in pencil. Ink them with a pen. Let the ink dry.
- Step 4: Erase the grid and pencil lines for both. Nice job!
